

Christo C

Full Stack Developer (Frontend-Heavy) · React.js · Node.js · FastAPI · TypeScript

christocdas0@gmail.com · +91-72930 62470 · [linkedin.com/in/christo-c](https://www.linkedin.com/in/christo-c) · github.com/christoc

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 4+ years of experience architecting and delivering scalable web applications that serve thousands of users. Proven expertise across the complete development lifecycle — from responsive React.js frontend interfaces to high-performance FastAPI and Node.js backends. Recognized for building reusable component libraries adopted across multiple product teams, establishing CI/CD pipelines that reduced deployment effort by 60%, and designing RESTful APIs that handle 50,000+ daily requests. Thrives in agile, cross-functional teams and consistently delivers maintainable, well-tested code.

CORE COMPETENCIES

- React.js & Next.js
- Node.js / Express.js
- FastAPI / Python
- TypeScript / JavaScript
- PostgreSQL & MongoDB
- Redux / Zustand
- REST API Design
- CI/CD & Azure DevOps
- Docker & AWS (S3, EC2)
- Turborepo / Monorepo
- Jest & Vitest Testing
- MUI / React Flow

PROFESSIONAL EXPERIENCE

Software Engineer — Full Stack – MathCo (The Math Company)

May 2024 – May 2026

Bangalore, India

- Architected and delivered full-stack features for NucliOS, an enterprise platform serving 200+ business users, using React.js and FastAPI microservices within a Turborepo monorepo.
- Built a reusable UI component library of 40+ components (React.js + MUI) adopted across 6 product teams, cutting new feature development time by 35%.
- Designed and implemented 25+ RESTful API endpoints that process 50,000+ daily requests with average response times under 120ms, backed by PostgreSQL and MongoDB.
- Established Azure DevOps CI/CD pipelines that reduced manual deployment effort by 60% and raised release frequency from bi-weekly to on-demand.
- Improved frontend code coverage from 48% to 82% by introducing Jest and Vitest test suites, reducing production bug rate by 40%.
- Collaborated across 3 product squads in agile sprints — conducted 100+ PR reviews, drove architectural discussions, and mentored 2 junior engineers.

Software Engineer — Frontend – PointCross Life Sciences

May 2022 – May 2024

Bangalore, India

- Developed and maintained 5+ full-stack web applications using React.js, Redux, and Node.js/Express.js, supporting clinical data workflows for 150+ pharmaceutical researchers.
- Created an internal React component library standardizing UI patterns across 4 applications, reducing per-feature UI development time by 30%.
- Implemented 30+ CRUD REST API endpoints integrated with MongoDB, handling research dataset ingestion pipelines exceeding 100,000 records.
- Designed fully responsive UIs with MUI following WCAG accessibility standards, improving user task-completion rates by 25% based on usability testing feedback.
- Delivered features consistently within sprint timelines across 12+ consecutive sprints; led technical specification writing and sprint planning contributions.

TECHNICAL SKILLS

Frontend

React.js, Next.js, TypeScript, JavaScript (ES2022+), HTML5, CSS3, Redux, Zustand, MUI, React Flow, Responsive Design, WCAG Accessibility

Backend

Node.js, Express.js, Python, FastAPI, REST API Design, OAuth2 / JWT Authentication, Authorization Middleware

Databases	PostgreSQL, MongoDB, Query Optimization, Schema Design, Data Modeling
Testing	Jest, Vitest, Unit Testing, Integration Testing, Test-Driven Development (TDD), 80%+ code coverage
DevOps	Git, GitHub, Azure DevOps, CI/CD Pipelines, Docker, Postman, Turborepo, npm Workspaces
Cloud	AWS (S3, EC2, CloudWatch, IAM), Infrastructure Configuration, Environment Management

KEY PROJECTS

Online Attendance Management System

MERN Stack · JWT Auth · RBAC

- Built a role-based attendance management system (Admin, Manager, Employee) for 500+ users, with JWT authentication and real-time dashboard analytics.
- Developed 20+ REST API endpoints for authentication, attendance tracking, and reporting; integrated MongoDB with indexed queries for sub-50ms responses.

E-Commerce Web Application

React.js · Node.js · MongoDB

- Developed a full-stack e-commerce platform featuring a 500+ SKU product catalog, cart management, checkout workflows, and order history.
- Integrated payment gateway API and implemented real-time inventory updates using MongoDB change streams.

OPEN SOURCE & TECHNICAL WRITING

- Developed and published reusable internal npm packages for frontend utilities within MathCo's private artifact registry, adopted across multiple product teams.
- Active contributor to monorepo tooling ecosystems using Turborepo and npm workspaces; documented internal architecture patterns adopted by the team.
- Author of technical articles on Medium covering React architecture, full-stack development patterns, and scalable web systems — reaching 500+ readers.

EDUCATION

Master of Computer Applications (MCA)

Expected 2026

Indira Gandhi National Open University (IGNOU)
